THE PHYSICAL WORLD ***An Exhibition of Painting and Sculpture*** **Thursday, May 9 – Saturday, June 29, 2002**

Gagosian Gallery is pleased to announce a group exhibition of painting and sculpture. The exhibition will include works by Jean-Michel Basquiat, Marcel Duchamp, Robert Gober, Damien Hirst, Jasper Johns, Donald Judd, Yves Klein, Franz Kline, Jeff Koons, Barnett Newman, Pablo Picasso, Robert Ryman, Jenny Saville, Richard Serra, Cy Twombly, Andy Warhol and Rachel Whiteread.

While seemingly diverse, the works all display a particular correlation between object and ground whether achieved two dimensionally or with an actual object. An underlying current of sexuality and death runs through and connects the works in the exhibition.

A fully illustrated catalogue will accompany the exhibition.

For more information please contact the gallery.
